

ALUTICA_TILT HEAD: TOGGLE REGULAR

ITEM: HH157

- Engineered from aircraft-grade aluminum, providing a heavy-duty feel and superior durability that plastic toggles simply cannot match.
- Features a precision-engineered mechanism that ensures 100% locking security on paracord and technical cording.
- The sleek, low-profile design is optimized for high-precision laser logo engraving, allowing the hardware to seamlessly integrate with your brand's aesthetic.
- Designed to securely lock critical tools like ice axes in place, preventing slippage while enabling rapid, one-handed access in the field.
