

ALUTICA_GUN CLIP HOOK (HH172)

LIFESTYLE

Crafted to precision using aircraft-grade aluminum, the HH172 provides manufacturers with a durable, lightweight, and versatile component for 25mm webbing.

Versatile applications:

- Quick detach function: Allows for instantaneous clipping and unclipping in dynamic environments.
- Used for standard clipping to fixed anchors, harnesses, or loops.
- The webbing strap may integrate a shock-absorbing element (though it appears to be a basic sling/lanyard here).
