

ALUTICA_ CAN TAP D-RING (HH025)

The Can Tap D-Ring is available in multiple sizes to accommodate various webbing widths, and it notably provides significantly higher tensile strength compared to the Clip Hook due to its fixed, closed design.

Key Features:

- Crafted from aircraft-grade aluminum, provides extra durability and high performance, functioning as a robust fixed connection point.
- Its primary purpose is to create a strong, permanent loop or anchor on a piece of gear, often used as an attachment point for accessories, straps.
- The inclusion of laser etching makes it ideal for branding and customization.
