

# LARGE CHASSIS HANDLE

**EXCLUSIVE**

The extra-wide retractable handle design allows maximum interior space utilization. The two tubes that are 36cm apart are placed on the edge of the bottom compartment, unlike typical bottom compartments, where the two tubes are placed at the center of the bottom compartments, providing maximum space utilization.

The handle grip (PP+TPR) offers a comfortable feel and durability.

Big wheels (110mm diameter) for smooth rolling on rough terrain.
